Re: Letter of Compliance with PFAS

Product: Paper Bags

Dear Valued Customer:

This is to inform you that our manufacturer does not use perfluoroalkyl and polyfluoroalkyl substances (PFAS) as a process aid in the production of our paper bags.

Furthermore, based upon our knowledge of the manufacturing process and information provided by our suppliers, we would not expect this substance to be present in our final product. We do not, however, specifically test the products for the presence of PFAS.

Thank you for being an Inteplast Group customer.

Sincerely,

Joe Wang
Global Sourcing Manager
