

# InteGuard™ Performance Hooder Films

Inteplast Engineered Films' (IEF) InteGuard line of stretch hooder and shrink hooder films provides industry-leading film performance and consistency for a wide range of applications. InteGuard films are designed to alleviate common performance issues typically seen with existing hooder films on the market. These films are compatible with all major hooder machine manufacturers' stretch and shrink hooder machines.

## Applications

InteGuard hooder films are the industry-leading choice for protecting and securing palletized products such as:

- Bagged chemicals & resins
- Building products & bagged cement
- Corrugated boxes
- Food & beverage products
- Household appliances (white goods)
- Insulation bales
- Lawn & garden products

## Features & Benefits

- Superior stretch properties compatible with a wide variety of applications
- Excellent containment force for load stability
- High puncture and tear resistance
- Available in a full range of widths and sizes, accommodating pallet sizes from 3'x4' to 4'x6'
- Customization options available upon request, including ultraviolet inhibitors (UVI) and other additives

## InteGuard Films for Stretch Hooder Applications

External Blend Code	Typical Gauge	Product Description
IPHO-HST	3.5 - 5.5	<b>High Stretch Hooder Film</b> Designed for applications requiring high stretch levels to conform to complex shapes while maintaining excellent protection from the elements.
IPHO-HCT	3.5 - 5.5	<b>High Containment Hooder Film</b> Designed for a variety of applications requiring high load-containment levels and compression strength.
IPHO-SHP	5.0 - 7.0	<b>Shrink Hooder Film</b> Designed for unstable loads that are not uniform to the pallet.
