

Biogen Saves **\$100,000** and **1,400 hours** with JoVE

1,400 HOURS

Saved by avoiding
travel to a remote lab

20%

Resources saved for every
new technique learnt

\$100,000

Saved by training new staff
members using JoVE videos

CHALLENGE

Typically, training each lab member on a new technique takes 36 hours. If no training resources are available, Dr. Sriperumbudur, Director of the In-Vivo Resource Center, must send a staff member to a remote lab to learn the technique. This process adds an average of 32 extra hours and \$4,600 in travel and lodging costs—just to learn a single technique.

SOLUTION

Having benefited greatly from JoVE during his previous role at NIH, Dr. Sriperumbudur introduced JoVE as a training resource to his lab at Biogen.

“JoVE videos are great training tools and serve as visual standard operating procedures in my lab. JoVE protocols give you extensive details on even what gauge needle was used. They are easy to reproduce because you have all the information, down to reagents.”

— **Dr. Raja Sriperumbudur**, Director of In-Vivo Resource Center, Biogen

BENEFITS/ RESULTS

With just 10 of the most frequently used JoVE videos, Dr. Sriperumbudur's lab at Biogen saved \$100,000 and 1,400 hours by reducing training and travel for 15 technical staff members.
