

HOW TO CLEAN WOOD FLOORS

WHEN TO CLEAN

YOUR MAIN GOAL:

Remove dirt and debris that could damage your floor or may be hard to clean up later

RIGHT AWAY - SPILLS

Wipe up spills with a rag or paper towels. Stains and grime will get harder to clean the longer you wait.

WEEKLY - HIGH TRAFFIC AREAS

Spray and mop once per week or more as needed. High traffic areas (kitchens, hallways, entryways and living areas) need the most attention.

AS NEEDED - LOW TRAFFIC AREAS

Clean low traffic areas like bedrooms, extra bathrooms, and guest rooms when dirt and dust as needed.

WHAT TO USE

- ✓ MICROFIBER DUSTING PAD
- ✓ VACUUM OR BROOM
- ✓ MICROFIBER CLEANING PAD
- ✓ HARDWOOD SAFE CLEANER

WHAT TO AVOID

- ✗ WET MOPS
- ✗ STEAM MOPS
- ✗ SUPERMARKET OIL SOAPS, WAXES, AND POLISHES
- ✗ STRAIGHT OR DILUTED AMMONIA OR ALKALINE PRODUCTS

WAX OR OIL FINISH?

This guide works for the majority of wood floors that are surface sealed.

For floors finished with a hard wax or penetrating oil, check with the flooring or finish manufacturer for which cleaning products are safe to use on your floor.
