PRODUCT OVERVIEW

With the latest HDMI 2.1a specification the lofty number of 48Gbps is this year's performance goal, and it can be a hard target to hit. However the new Ethereal MHX Ultra-Flex 48Gbps HDMI® cables meet this challenge with a design that is years in the making. The Ethereal Home Theater development team used a combination of advanced metallurgy and cable topology technology to meet and exceed the requirements of the latest sources and gaming devices without the need for added "booster" electronics. The result is an easy to install cable that is more than capable of supporting your 48Gbps needs.

- Supports 8K/10K D/HDR
- 24K gold-plated Grip-Lox™ connector for securing cable to devices
- Increased tensile pull tension without the risk of damaging connected equipment
- Multi-layer shielding
- Metal Head Shell to protect your sensitive electronic devices from the high frequency RF noise generated by 48 Gbps
- Audio return channel (eARC/ARC)
- 48 Gbps
- Fully supports all HDMI 2.1 devices
