

ROUSH®

WELDING & FABRICATION

For over 35 years, Roush has excelled in providing comprehensive product development services to customers in the transportation, defense, aerospace, theme park, and consumer product industries. Our Code Welding and Fabrication group plays a critical role in our ability to deliver turnkey solutions.

We're focused, we're efficient, and we're at our best when we're challenged to think outside the box — critical traits when our customers' success depends on how quickly we can take their visions from the sketchpad to the marketplace.

For more information, please [click here](#).

Roush manufactures structures constructed with ferrous and non-ferrous metals, employing numerous strengthening mechanisms. Our expertise enables Roush to assist our customers with selecting materials and processes to ensure cost-effective, purpose-built, robust weldments.

Our procedures adhere to all common welding codes, including **AWS, ASME, defense, and European ISO certifications**. Roush's quality operating system requires strict adherence to proven quality standards. Program specifications frequently require that weld joints be inspected both prior to and following welding. These inspections are performed by trained welders, supervisors, weld engineers, and AWS Certified Welding Inspectors.

Our goal: To provide the highest quality fabricated and welded products quickly, efficiently, and cost-effectively

ROUSH[®]

www.roush.com

CUSTOMERS INCLUDE:

- Disney
- Universal Studios
- Bell Helicopter
- AM General
- FAAC

CAPABILITIES INCLUDE:

- Metal fabrication
- AWS code welding
- 32 certified code welders
- 3 on-site AWS CWI
- In-house metallurgical laboratory with testing and consulting services
- Over 50,000 square feet of welding shop area
- Laser cutting
- Fixture design and build

... And seamless access to Roush's design, engineering, CAE, rapid prototyping, tooling, and manufacturing services.
