

HOW TO PREVENT DAMAGE FROM UV RAYS

Most hardwood floors will develop a patina over time due to sunlight. Find out the best ways to avoid damage!

1

REARRANGE RUGS AND FURNITURE

Move your furniture around every once in awhile to avoid discoloration.

2

INSTALL CURTAINS OR BLINDS

Keep them closed when you leave your house for extended hours!

3

USE A FINISH WITH UV INHIBITORS

Haven't installed yet? This is the best option to protect wood flooring long-term.

4

CONSIDER A RECOAT

See spots where the color has changed? Sanding & recoating can make your floor look like new!
