

# Amp Multi

A bespoke audio experience for your home

SONOS

## Precision-built for ultimate flexibility

Sonos Amp Multi uses next-generation technology to deliver premium audio throughout your home, powering up to four zones with reliable sound in every room. It's packed with advanced features to bring you a bespoke audio experience, and pairs with virtually any low impedance passive speakers, including the Sonos Architectural series.

## Four zones, endless possibilities

Stream up to four different audio sources at the same time using Apple AirPlay 2, Spotify Connect, or — for greater control — the Sonos app. You can also connect devices like turntables and send that audio to any zone you choose. Each zone has its own independent controls for music and volume, giving you an easy playback experience.

## Innovative design

Amp Multi's smart design streamlines installation to help get your audio system up and running fast. The compact, rack-friendly unit saves space and keeps cool, even when stacked. Engineered for efficiency and longevity, Amp Multi uses very little energy (less than 5.4W when idle, with wifi disabled) and is serviceable to both increase its lifespan and reduce its environmental impact.

## Looks as good as it performs

Get multi-zone audio from a single elegant device. The compact design features a refined finish and looks perfectly at home on a shelf, in a credenza, or wall-mounted.

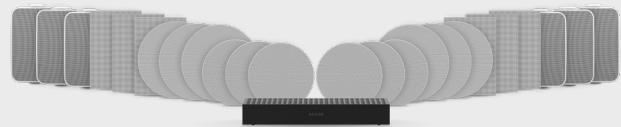

## Bespoke audio experiences

Amp Multi is fully configurable to suit your exact needs, delivering exceptional audio performance in every room. It integrates seamlessly with leading smart home platforms, allowing you to create a fully tailored audio environment that works in harmony with the rest of your connected ecosystem.

## A complete Sonos experience

Amp Multi automatically configures Sonos Architectural speakers for the best sound and performance. It also works seamlessly with all your other Sonos products through the Sonos app, so you get an exceptional customized sound experience throughout your home.
